STRESEEZ PLUS® is a nutritionally balanced range of essential vitamins, trace minerals and electrolytes for animal drinking water. For years, **STRESEEZ PLUS®** has led the market among very large poultry producers. Now **STRESEEZ PLUS®** is also available to smaller-scale producers in a convenient 10-gram packet. It dissolves readily in drinking water for quick absorption to aid newly born animals or hatchlings right after placement; as a "nutritional booster" each month; during times of stress or whenever feed consumption is reduced.

STRESEEZ PLUS®

IN A 10-gram PACKET IDEAL FOR SMALLER-SCALE OPERATORS

Code #2028

COLOR AND TEXTURE:	Yellow, Granular powder
PACKAGING:	10-gm foil packets; 100 packets per carton. Also available in 50-lb bulk cartons and 6-ounce foil packets.
SOLUBILITY:	Excellent
INDICATIONS:	Water supplementation (Prepare fresh solutions daily)

FEATURES:

VITAMINS: Includes a complete array of vitamins in sufficient amounts to provide a significant boost. Vitamins A, D, E to help resist diseases, improve reproductive performance, and strengthen bones and eggshells. Plus, all B vitamins necessary for growth, reproduction and fighting stress.

ELECTROLYTES: The correct balance of sodium and potassium for nutritional needs, and to help fight heat stress or scours.

TRACE MINERALS: Zinc, copper, manganese, magnesium, iodine and cobalt to provide nutritional support for growth and tissue repair.

USE: Add ¼ teaspoon to one gallon of water. The 10-gm packet treats up to 7 gallons. One 10-gm packet is enough for up to 50 chicks for days 0-4 and days 9-12. Then two 10-gm packets would be required for each 50 chicks for 4 days during week 4 (days 29-32).
